## Geospatial server with proprietary formats to address complex purposes

Examind Server is a geospatial platform designed to handle complex formats and spread data through interoperable web services or 2D / 3D and ND applications.

- ▶ Data integration, processing, analysis and spread
- ▶ Advanced formats handling (S52, S63, AML...)
- ▶ Big Data and multidimensional handling

### Modular offer

Perpetual license
One year warranty
Warranty extension / year
Setup support
Migration / Infrastructure support
Three support levels
Custom made adaptation
Training

## EXAMIND SUITE

- ▶ More than 10 years of R&D to develop Examind software suite
- ▶ Build on a transparent opensource core
- ▶ Interoperable: OGC standards-compliant
- ▶ Design for IOT and cloud infrastructures

## FEATURES

- ▶ Collect, analyze and share heterogenous big datasets
- ▶ Modelize and automate geospatial workflows
- ▶ Deal with real time data collection

## APPLICATIONS

- ▶ Earth observation portals
- ▶ Geographic, hydrographic, oceanographic and meteorological purposes
- ▶ Defense and marine applications
- ▶ National and international data infrastructures

... and all GIS data managers
